There will be a business meeting of the Buckeye Club on Friday, November 15, at 7:30 p. m., at my residence, 1556 Nuanu, to consider the disposal of the McKinley Memorial Fund.

C. H. DICKEY,  
President.

## ROOT IN WHITE HOUSE RUNNING

Senator Scott Springs Surprise on Slate Makers--Taft's Hard Row.

(Mail Special to the Advertiser.)

WASHINGTON, D. C., November 2.—The big politicians will take to bomb proofs for residence in Washington this winter, if President Roosevelt continues the warfare now expected of him. A few little things have occurred the past week, which the friends of other candidates attribute to him and which indicate more than ever a hot, hard contest for delegates to the next national convention. If incidents are correctly interpreted, the President has begun an aggressive, determined fight against Governor Hughes. A few days ago it was intimated that Governor Hughes should be held responsible for the Parsons-Hearst fusion in New York City. This intimation came from a source that strongly suggested the White House, and at a time when there was renewed clamor for the President to make some declaration that he was not responsible for that fusion.

### ROOT UP AGAIN.

Cannon, Knox and other Republican candidates have men here watching every development. They insist that the President himself knows how that intimation originated, and also that he knows why Senator Scott of West Virginia emerged from the White House offices a few days ago, suggesting that Secretary of State Root should be nominated for the Presidency. Mr. Scott greatly surprised his political associates by that declaration. He has given numerous interviews, first and last, from the steps of the White House offices, booming various candidates. In a confidential conversation only a few days ago he said he had been for Fairbanks all along, but now that the Fairbanks boom seemed to have collapsed supposed he must eventually take his coat off for Cannon.

This talk, somehow, became the property of several President-makers, who were highly displeased that the Senator should come out for Root. The National Committee contingent, who are now urging the Cortelyou boom more vigorously than ever, have been whispering around the hotel corridors that the President suggested a little boom for Root to the Senator. They reason also that such things only embarrass the New York politicians who are trying to commit the Empire State to Hughes.

### THE HUGHES BOOM.

Those strategists who would concentrate the fight against the President's favorite candidate, by making common cause for the time being under the Hughes standard, have been disconcerted a little by the general acclaim in recent days for the Secretary of the Treasury. His star has been rising since he displayed such a masterly grasp of the financial situation during the panic. Bankers and business men have encouraged his Presidential ambition by some substantial declarations. Should his candidacy grow much beyond the dark horse stage, he and those behind him would sooner or later have to turn in and try to win a substantial following of delegates in his home State of New York.

### ANYTHING TO BEAT TAFT.

At present the Hughes and Cortelyou workers are in close sympathy. They want to keep the President from nominating Taft, however much or little Hughes and Cortelyou may be interested in that effort. The same is true of the Cannon workers, who have been showing new life the past week and now promise to come down to Washington early in December and "whoop it up" for the veteran Speaker.

### CORTEYOU'S STRENGTH.

Secretary Cortelyou's friends are now going to exploit the friendship of organized labor for him. He has sided with labor on some important issues. It is claimed he will have the solid support of the labor forces that have already opened their guns upon Secretary Taft. His record as Secretary of Commerce and Labor, especially his insistence on a separate labor bureau in the department, and as Postmaster General is being gone over in detail and prepared for political distribution. Capital is very friendly to him; labor is friendly; Roosevelt enthusiasts would not oppose him. The Secretary's boomers argue that once these facts come to be generally recognized, as it is proposed they shall be, there will be a compact phalanx of strength which must command the admiring attention of the country.

ERNEST G. WALKER.

## WALLACH WILL BE HERE WEDNESDAY

Wants to Be on Hand When the Board Declares Itself.

Wallach is in Hilo, but will probably return to Honolulu by the Kinau on Saturday. Such is the statement made by Charles Nottley.

The supposition seems to be that Wallach wants to be here to be on hand when the Board of Health meets next Wednesday, at which time President Pinkham promises that the whole matter shall be made plain. At which time, also, it is expected that the board's plan for giving Wallach the opportunity he has been asking for to test his remedies will be made public. Wallach seems to have abandoned his plan for a tour of the islands, in order to get here in time for the meeting Wednesday. He has not gone to any part of the Island of Hawaii except Hilo.

Delegate Kuhio returned from Molokai yesterday morning. He says that he went of his own volition and not with any authority from the board to make arrangements with the people there for the Wallach tests. He says that he heard that there was likely to be trouble there and he went over to quiet it if he could. He says that he was well received by the people, and that they came nearly half way up the hill to meet him, he going into the Settlement over the pali.

Charles Nottley says that his brother writes him that the Delegate was rather coldly received and that a large number of the people there, himself among the number, would not go to the meeting which was called to listen to what the Delegate had to say.

It seems altogether probable that the Delegate is speaking in an official and not in a personal or specific way when he says that he went to the Settlement without any understanding with the Board of Health, and with no promises or representations to make to the people there. Kuhio had a permit from the President of the board to go into the Settlement, and such permits are not usually granted without the President knowing pretty well what is wanted with them.

President Pinkham had a conference with Kuhio after the return of the latter yesterday morning and he seemed very much pleased with the result of it. However, he would not say anything regarding the matter, insisting that he would make a full and complete, and satisfactory statement at the meeting of the board next Wednesday.

There is much to indicate that there is considerable inharmonious in the Board of Health on the Wallach question. Fred Smith did not attend at least two of the "private" meetings of the board. Dr. Wayson has consistently held that the question is not one of whether Wallach is a fake or not, but is one of policy in view of the fact that the lepers are regarded by the law as incurable, but naturally their hopes are aroused by any claim of ability to cure, and they grasp at Wallach's claims as a drowning man grasps at a straw. David Kalauokalani entertains very much the same opinions, and M. P. Robinson, who in the past has voted against Wallach, is believed now to be willing to accede to the request of the lepers represented in the petition from five hundred and twenty-seven of them. It is not certain, either, that Attorney General Hemenway may not conclude that the request of the lepers ought to be in some way complied with rather than that the board seem to be in the attitude of denying them hope. This leaves only Dr. Baldwin and Fred Smith as pronounced conservatives, with Pinkham an unknown quantity.

The reason assigned by Charles Nottley's correspondent from the Settlement for the cold reception alleged to have been given the Delegate, is because the Delegate in the Board of Health meeting said that Wallach ought to be thrown out of the window, whereas the people at the Settlement think he may prove their savior.

### PREVENTING DUSTY ROADS.

Consul T. H. Norton, writing from Chemnitz, says that a Saxon firm has introduced a new road-binding composition called "Apokonin," which has been tried on the macadamized streets of Leipzig and other places with much success. The material is thus described:

It is a mixture of the heavier residual oils obtained in the distillation of coal tar with high boiling hydrocarbons. The method of mixing apparently involves a certain degree of chemical combination, in which phenol and similar constituents play a role. The manufactured material is prepared for use by heating in iron caldrons, identical with those used for asphalt, to temperatures ranging from 212 deg. to 248 deg. F. (100 deg. to 120 deg. C.). It is then sprayed evenly over the surface of a roadway with a special form of apparatus, and under such high pressure that the fluid mass penetrates to a certain distance into the upper layer of dust or dirt. The result is the formation of a compact lustrous black coating, which meets the demands of heavy traffic and is not disintegrated into dust particles. A marked advantage of the new process over the methods hitherto employed for the same purpose, and based upon the use of ordinary tar, is the total absence of odor after the application.—Consular Trade Reports.

## TODAY THE LAST DAY FOR TAXES

Tax Office Open Until 8 o'Clock ---The Penalty After Today.

The Tax Office will be open until 8 o'clock tonight for the convenience of taxpayers. This is the last day for the payment of taxes.

Since July 1 to the close of business November 13 the collections have been in the County of Oahu \$297,558.57. The collections for Honolulu for Thursday and Friday are expected to be about \$35,000. From the outside districts of the county the receipts up to the close of November 15 are expected to be close on to \$72,000. Thus the total collections for the period are expected to be in the neighborhood of \$400,000—something over. The collections for the first period were \$521,367.79, but all specific taxes such as the poll tax, the tax on carriages and automobiles, and bicycles are payable during the first period.

Practically all of the large taxpayers have paid their taxes. The taxes receivable from now on are from the moderate and smaller taxpayers. A large proportion of the taxes are paid by check which are exchanged at the banks on which they are drawn for certificates of deposit which are deposited with the treasurer in lieu of coin.

After tomorrow, a ten per cent penalty will be added to all taxes.

## KLUEGEL YESTERDAY GOT HIS COMMISSION

Superintendent of Public Works Campbell yesterday signed the Commission of C. H. Kluegel as Engineer of the Department of Public Works.

Kluegel arrived by the Buford from San Francisco. Yesterday morning he was at the Public Works department and went over a number of matters in the office with Superintendent Campbell. The next few days will be spent with Superintendent Campbell in getting into touch with the active work of the department. He will actually take hold on Monday.

The department will very shortly begin building schoolhouses on an extensive scale.
